

WINDOW STICKER

Create personalized window stickers from images or company logos using your inkjet printer. Use it for promotions/advertising, machinery labels, or window displays, this product can have many applications, and it will not leave a residue when it's time to be removed. Made from PET plastic it will produce high quality images from virtually any ink jet printer with a strong adhesive backing.

How to Use

1. Edit your photo or image(s) on your computer to fit on A4 size.
2. Reversing/Mirroring the image is not necessary for this product.
3. Set the mode of paper as "inkjet clear film" and "High Photo Quality"
4. Check that you have selected the HIGH GLOSS finish side of the film for printing. The backing film has a white semi-glossy finish. If you print on the wrong side, the ink will not take to the film and will appear watery and blurred. Simply wipe off and start again if this occurs.
5. Leave to dry for 10-15 minutes or use a hair dryer to speed up.
6. Cut and trim around the image before use.
7. Remove the backing film and stick onto the desired surface.

This product is designed for use in INK-JET PRINTERS only.

Laser Printer systems will cause heat damage to this product.
