

# D.I.Y Temporary Tattoo

Make your own tattoo sticker yourself using Temporary Tattoo transfer paper. It is our newly developed and patented goods. You can print any private images or photos through your personal inkjet or laser printer and apply it onto your skin.

One

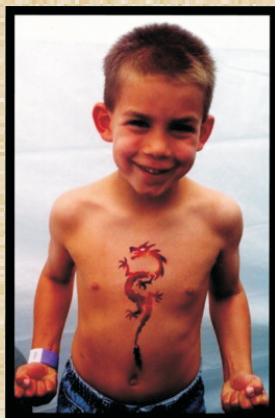

*Make it whatever photo or image you want!*

Two

Anyone can create their very own designs or choose their favourite image or photo. After creating the design, print it using a standard inkjet or laser printer. Protect the prints by applying protective film supplied. Once done trim the sheet down into individual tattoo transfers.

*Express Unique Personality Yourself!*

Express unique Personality Yourself!  
No way to express your personality with ordinary commercial tattoo!  
With temporary Tattoo Transfer Paper you can create your very own tattoo designs and become a body artist

## Design your artwork on computer

Enhance the quality of image as much as possible

**Mirror** the image to make it face down when to stick on skin

## Print the image on the glossy side of the tattoo paper through standard inkjet or laser printer.

Adjust condition of printing to high resolution.

Change the paper type in printer properties to Thick Photo Paper or glossy paper

## Dry the printed sheet using a hair dryer

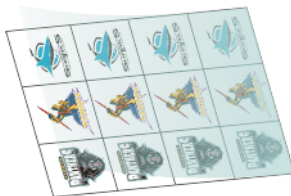

Please ensure the ink dries properly otherwise the adhesive will not stick very well

## Remove protective clear film off backing

## Stick the clear protective film onto tattoo sheet

When applying clear film, use a squeegee to remove any air bubbles.

Using a pair of scissors trim tattoos down into individual pieces.

Remove the tattoo transfer from the protective clear film using finger nail.

Stick it onto dry the skin with the image facing down and carefully rub it on.

Wet the back of the tattoo transfer with a wet sponge or tissue paper.

Leave it on for about 30 seconds. Simply remove the backing paper. And the temporary tattoo is now applied.
